

## **DIGITAL PICTURE FRAME WITH PICTURE ACQUISITION**

5

### **ABSTRACT OF THE DISCLOSURE**

10           An digital picture frame capable of acquiring image  
of the picture independently, especially to digitalize  
the image of photos to a digital format and then display  
it on a display panel. The digital picture frame includes  
a display module which supports the image display, a  
scanning module which scans photos, and an input/output  
module for image delivery over external image  
processing/storing devices, such as the hard disk,  
15   camcorder, digital still camera and network image server.
